April 2 – April 8

Date	Activity	Time Spent
Sunday	**UI cleanup for Create Tile Set and Main Screen** This involved finding better fonts for use with the buttons, labels, and text areas, and fixing the positioning of screen elements.	2 hours
Monday	**User Interface Work** Spent some more time refining the look and feel of the interface…. Basically, lots and lots of polishing up. **User Manual** Started outlining what elements would be in the User Manual.	1 hour 1 hour
Tuesday	**Testing Session and Team Meeting** Attended the Testing Session and the Team Meeting	1.5 hours
Wednesday	**User Manual** Started putting together the user manual. I came up with 5 main sections: a. Getting Started b. Tile Arrangement c. Playback d. Creating a Tile Set e. the Glossary. I have most of the elements figured out for each section, except for the Glossary since I will not really know most of the items until the more of the manual is done. Within that 2 hour period I got the table of contents written up and the first section completed.	2 hours
Thursday	**User Manual** Spent another 2 hours refining the table of contents (name changes and new items added under several sections). Also, I found a good font type to use (Book Antiqua) so it looks a lot more professional. In terms of work done on the sections, I got section 2, Tile Arrangement nearly done. **Team Meeting** Attended the team meeting to discuss status report and the work we will be completing before then.	2 hours 1.5 hours
Friday	**User Manual** I continued to work on the User Manual for another 2 hours. I finished up the Tile Arrangement section and the Playback section. I am at a point where I can now start working on the Help menu since I have some solid content and a solid organization of the content.	2 hours
Saturday	**User Manual/Help Menu** Added create tile set section to the User Manual. There is still the Glossary to do and to clean up the other sections. Then I worked on for about 4 hours the help part of the system.	5 hours

	As of right now, it has 3 of the 5 parts done. I still have to complete the create tile set section and glossary.	

Total Time: 18 hours

March 26 – April 1

Date	Activity	Time Spent
Sunday	Testing Result compilation	1 hour
	Improving Assignmnet 1 for user testing	½ hour

Monday	**Context menu Additions**
	  a. right/left tile bin position
