April 10 – April 29

Date	Activity	Time Spent

Remaining Project Time	<u>User Manual Additions</u>
	    1. Preloaded Sets (Section 5)
	    2. Blank Tile Information
	    3. Glossary Terms
		2 hours

	<u>User Manual Corrections/Fixes/Client Feedback</u> I revised the user manual based on feedback from our client and the team.	3 hours

	<u>Help Updates</u>
	    1. Created HTML versions of User Manual to be read in
	    2. Updated the code to use one method to read in each section
		6 hours

	<u>Team/Client Meetings</u> Meetings for project wrap-up	5 hours
	<u>Testing Recap</u> I worked on the Testing Recap which discusses what we planned on doing and what actually happened with our testing.	2 hours
	<u>Mac-Windows Compatibility Testing</u> I worked on a Mac computer in the Science Building to finalize the user interface so that there was consistency between mac and windows. This involved installing eclipse on a Mac and working to correct any look and feel issues (ie: spacing, component sizes, font type/size differences, etc.)	6 hours
	<u>Website Updates</u> Finalized the website by adding links for posters and the new documentation (java docs, user manual, etc.) and updating the links to documents from last semester.	4 hours
	<u>Schedule Update</u> Reworked the presentation schedule so that it shows feature task breakdowns as they occurred over the entire semester.	2 hours

Total Time: 30 hours
