The list of the keywords we discuss today (8/27/2018)

- Process (#1, #2)
- Program Control Block (PCB) (#3, #4)
- Monolithic-structure OS (#5)
- Virtual Machine (#7, #8, #9)
- OS Kernel (#10)
- Micro-Kernel architecture (#11, #12, #13)
- Process scheduling (#14)
- Long-term process scheduling (#15)
- Blocked state (#21)
- Short-term process scheduling (#22)
- Ready state and running state (#24, #25)
- Medium-term process scheduling (#26)
- FCFS (First Come First Serve) process scheduling algorithm (#29)
- RR (Round Robin) process scheduling algorithm (#30)
- SJF (Shortest Job First) process scheduling algorithm (#31)
- SRTF (Shortest Remaining Time First) process scheduling algorithm (#32)
